## FOREWORD

---

The report on Brief Industrial Profile of Purulia district has been updated for 2018-2019. The report chiefly focuses on the district profile, major resources available in the district and the existing infrastructural facilities, which can be utilized to provide support to the existing industries and encourage creation of new enterprise in the district. The report also explores the scope for ancillarisation, present industrial scenario, existing large & medium scale enterprises in the district, no of UAMs registered and other related issues which examine the industrial potentiality of the district. Besides, the potential areas for developing and setting up new MSME Units have also been addressed separately.

In preparing this report, necessary data and co-operation has been obtained from various departments of the State Government, Central Government, Financial Institutions, MSME stakeholders, Promotional agencies and other related departments. The major source of information has been the Bureau of Applied Economics and Statistics, Government of West Bengal (District Statistical Handbook). I would like to extend my sincere thanks and regards to all of them for their sincere co-operation and assistance.

I hope this Report will be found very useful by Promotional Agencies, Financial Institutes, NGOs and above all the small scale entrepreneurs of the district.

I appreciate the efforts rendered by Sri Tarak Kangsabanik, AD(G & C), MSME-DI, Kolkata and the officers of EI Division in preparation of this Report.

## **Brief Industrial Profile of Purulia District** **(WEST BENGAL)**

### **1. General Characteristics of the District:**

Purulia district is one of the twenty three districts of West Bengal state in Eastern India. Purulia is the western most district of West Bengal. Purulia is the administrative headquarters of the district. Some of the other important towns of Purulia district are Raghunathpur-Adra, Jhalida and Balarampur. The territory was a part of Banga one of the 16 Mahajanapadas according to Jaina Bhagavati Sutra and also a part of the country known as Vajrabhumi in ancient period. During medieval period, the territory was a part of Jharkhand region.

#### **1.1 Location & Geographical Area.**

Purulia lies between 22°43'N and 23°42'N latitudes and 85°49'E and 86°54' E longitudes. The geographical area of the district is 6259 km<sup>2</sup>. This district is bordered on the east by Bankura, Paschim Medinipur districts, on the north by Bardhaman district of West Bengal state and Dhanbad district of Jharkhand state, on the west by Bokaro and Ranchi districts of Jharkhand state and on the south by West Singhbhum and East Singhbhum districts of Jharkhand state.

#### **1.2 Climate**

Purulia is one of the drought prone districts of West Bengal. It has a sub-tropical climate nature and is characterized by high evaporation and low precipitation. Temperature is very high in summer and low in winter varies from 5 degrees in winter to 46 degrees in summer thus causes dryness in moisture. Average annual rainfall varies between 1000 and 1600 mm.

#### **1.3 Topography.**

Purulia district is characterized by undulated rugged uneven upland, succession of plateaus, hills, low valleys and high ridges. The eastern part of the district consists of a rolling upland which changes to a rugged upland and dissected topography in the west.

There are good numbers of rivers and tributaries flowing through the district. The principal rivers of the district are - Damodar, Kangsabati, Kumari, Darakeswar and Subarnarekha. All the rivers have easterly or south-easterly courses; only the Subarnarekha flows southwards and receives west and south flowing tributaries. All the tributaries of these rivers are non-perennial and subject to flash flood.

The soils of the district are mostly sedentary in nature. Soils of undulated uplands are shallow, gravelly, coarse having low water holding capacity. These lands are either severely eroded or very susceptible to erosion. Alluvial soil is found only in valley bottom in very narrow strips along the rivers, mostly in the fringe areas of Ajodhya Hills.

#### **1.4 FOREST**

There is 75.05 thousands hectares forest area in Purulia. The natural forest of the district is restricted to north-west region of the district covering Ajodhya Hills and Panchet Hills of the north-east. Forests of Purulia district mainly comprised of Sal trees mixed with miscellaneous species like Palash, Kusum, Mahua, Neem, Kend, Simul, Sirish small woods, firewood, medicinal plants etc. plants like Aswagandha, Satmuli, Vrigoraj, Haritaki, Bahera, Amla, Karanj, and Neem are present in the district. Sal seed, bamboo and kendu leaves are major non-timber products of this district.

## 1.5 MINERALS

Purulia district is very rich in mineral deposits. Good number of important minerals like coal, copper, china clay, feldspar, fire clay, fluorite, gold, graphite, iron-ore, kyanite, kaolinite, lime stone, moulding sand, manganese, pegmatitic vein quartz, rock phosphate, uranium etc. are available in this district.

**Coal:** Till now coal mining has been the most important extractive industry in Purulia. An estimated deposit of coal in Purulia is 43 million of high grade quality and 11 million low grade quality coals. Working collieries are all in the Neturia Police Station area.

**Copper:** Recently a 6 meter deep ancient copper mine has been unearthed at Tamakhun under Manbazar PS; the estimated reserves is 8000 tonnes.

**Iron-ore:** Small patches of iron-ore found at Panchet Hills, Jhalda, Gourangdi, Supur and Manbazar. Most of these are associated with pegmatites, magnetite and rutile.

**Gold:** Gold is found nearly all the streams of the district. Totko Nala, Kumari Nala, both tributaries of Kangsavati are said to be most productive streams of gold.

**China Clay:** In terms of China Clay the district has the leading in West Bengal. Important deposits are located at Dhatara, Kalajhor and Kalaboni, Mahatamara, Sialdanga, Dandudig and Tamakhun. The Dhatara reserves has been estimated to be 8.2 lakh tones and Sialdanga 1.3 lakh tones.

**Fire Clay:** The important deposit of fire clay occur at Hermits hut and Ranimahal on the Panchet Hill. There is another deposit at Rajabasa.

**Feldspar:** Feldspar occurs at numerous places. The deposits lying near rail heads are usually exploited.

**Fluorite:** This is an important and unavoidable mineral used in steel and chemical industries. It is a rare mineral and therefore of great significance. In Purulia its deposits are at Belamu hills under Jhalda PS.

**Lime Stone:** Lime stone deposits are in several pockets of the districts. There is about 20 million tones of lime stone deposits at Jabar and Ichahatu.

**Moulding Sand:** Moulding sands have been found in a number of places in the district Girphala, Saspur, Soiuri, Jagnathadih, Bagulia, Dumdumi, Baltora, Chaurashi and Rampur. There are a number of working mines near Madhukundu Rail Station.

**Uranium:** Uranium is a radio-active mineral and found at Kulipal, the tri-junction of Purulia, Bankura and West Medinipur districts.

**Kyanite and Graphite:** Kyanite and Graphite both have been found at Kalajhor, Kahipur, Gojrangadih, Bongora, Dimadiha and in the Panchet Hill area.

In addition to the above said minerals, a number of minerals like Silica, Titanium ore, Manganese etc. are also found in the district.

**2. Administrative set up.** The District comprises three subdivisions: Purulia Sadar East subdivision, Purulia Sadar West subdivision and Raghunathpur subdivision. Purulia Sadar West subdivision consists of Jhalda Municipality and seven CD Blocks; Raghunathpur subdivision consists of Raghunathpur Municipality and six CD Blocks.

There are 22 police stations 170 Gram panchayats and 2459 inhabited villages in the district. Purulia town is the district head quarter. The said information is arranged in table as below-

#### 4. TRANSPORT

**4.1 Rail:** Purulia is well connected with other cities and towns of West Bengal and neighbourhood states by road and rail transport. The district is served by three Rail connections provided by South Eastern railways. One line runs from Jharkhand in the south through the district up to Asansol passing through Adra Division. Another line runs between Bankura and Dhanbad also via Adra Division. The third line connects Purulia with Jharkhand. Major cities and town of the country are connected with Purulia by rail.

#### 4.2 Road:

The road transport in Purulia is adequate in terms of bus availability and good flow. NH 32 connects this district with Jamshedpur, Bokaro, Chas and Dhanbad; NH 60A connect Purulia with State Highway 9 at Bankura and subsequently to NH2 at Durgapur. State highway 5 also plays important role in district's transport network as it connects towns like Raghunathpur, Adra, Santaldih, and Neturia to NH2 at Nematpur and Asansol. Purulia has excellent road connectivity with Raniganj-Asansol industrial belt.

## 8. General issues raised by industry association during the course of meeting

Purulia is an industrially backward district. Mostly agricultural based cottage & tiny industries exists which use indigenous skill-based technology. For rapid industrial expansion, modern industries using updated technology needs to be set up in the district. The district is adversely affected by flood or draught very frequently which hampers industrial development. These problems need to be tackled urgently.
